PROFESSIONAL SUMMARY

Computer Science Engineering graduate specializing in AI & Data Science, with hands-on experience building full-stack applications using Java, Spring Boot, React.js, and MySQL. Skilled in designing RESTful APIs, implementing JWT-based authentication with Spring Security, and building responsive, component-based frontends with React.js and Bootstrap. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks, with practical exposure to API integration, Git-based version control, and Agile development practices.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), SQL

Frontend: React.js, HTML5, CSS3, Bootstrap 5, Responsive Web Design

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT, BCrypt

Databases: MySQL, MongoDB

Frameworks & Libraries: React Router DOM, React Context API, Axios, JSON Server

Developer Tools: Git, GitHub, GitHub Actions, Postman, Swagger OpenAPI, Docker, Maven, VS Code

Core Computer Science: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Design Patterns, MVC Architecture

PROJECT EXPERIENCE

Employee Management System Portal Dashboard

May 2026

React.js, Spring Boot, MySQL, REST APIs | Live: ems-lime-seven.vercel.app/login

- Developing a full-stack Employee Management System to streamline employee records, attendance tracking, and leave management.
- Implementing CRUD operations for employee data through RESTful APIs integrated with a MySQL database.
- Building a responsive, component-based interface in React.js integrated with Spring Boot backend services.
- Designing dedicated modules for attendance tracking, leave management, and employee data administration.
- Structuring the application using component-based architecture and maintaining version control with Git and GitHub.

Readify — Bookstore Management System

June 2026

React.js, React Router DOM, Context API, Axios, Bootstrap 5, JSON Server, Vite | Live: readify-smoky-mu.vercel.app

- Developed a responsive single-page bookstore application supporting distinct customer and administrator workflows.
- Implemented role-based client-side routing and protected dashboard navigation using React Router DOM and Context API.
- Built complete CRUD functionality for books, shopping cart, orders, and user profile management through REST API integration.
- Integrated Axios for asynchronous communication with a JSON Server backend and managed global application state using React Context API.
- Designed responsive user interfaces with Bootstrap 5 and optimized client-side routing for deployment on Vercel.
- Implemented inventory validation, checkout workflows, search and filtering, and session persistence using local storage.

Cloud-Native Task Management API

April 2026

Java 17, Spring Boot, Spring Security, JWT, Spring Data JPA, Hibernate, MySQL, Swagger OpenAPI, Docker, Maven |

GitHub: github.com/ShafirinSulthan/task-management-system-springboot

- Designed and developed a secure RESTful Task Management API using Java 17 and Spring Boot, following a layered Controller-Service-Repository architecture.
- Implemented JWT-based authentication and Spring Security to protect REST endpoints with role-based access control (RBAC) and BCrypt password encryption.
- Built CRUD APIs for task creation, assignment, status tracking, and lifecycle management using Spring Data JPA and Hibernate with MySQL integration.
- Developed dashboard APIs delivering task analytics across Pending, In Progress, Completed, and Rejected status categories.
- Implemented entity relationships, DTOs, global exception handling, and request validation to improve API maintainability and reliability.
- Integrated Swagger OpenAPI for interactive API documentation and Docker for containerized application deployment.

EDUCATION

Hindustan Institute of Technology and Science

Jun 2022 – Apr 2026

B.Tech, Computer Science Engineering (AI & Data Science) | CGPA: 8.12/10 | Chennai, India
